

MACHINE TRAINING

HM ACADEMY

We offer hands-on training through our HM Academy. Your team will learn how to operate and maintain our machines. We also provide consultancy on how to improve production quality, choose the right materials, and work more efficiently to meet all your production goals and reach the perfect wheel / bicycle

HM Academy Training (at HM Headquarters)

HM Academy training is conducted at our headquarters and provides hands-on instruction by experienced specialists.

Participants gain in-depth product knowledge and practical skills, ensuring

they can operate, maintain, and service equipment safely and efficiently.

On-site Training

On-site training at your location is also available, allowing participants to train in their own environment and on their own machines. A personalized quotation can be provided upon request.
